E-invoicing & P2P Automation. Easy. Powerful. Smart.

YoozProtect

Defend Against AP Fraud

Today's fraud isn't a question of *if*, but *when*.

Don't Settle for a Shield When You Can Have a Fortress.

Traditional, manual security measures are mere shields, while YoozProtect is a complete fraud prevention solution - building a fortress around your accounts payable process. Backed by years of protection expertise, YoozProtect delivers 24/7 automated security, ensuring potential threats are detected before payments are ever made.

Get the Highest Level of Security for Your Processes.

- Reduce financial exposure, risk, and liability.

- Proactively identify and flag suspicious activity.

- Ensure payment integrity and strengthen internal controls.

- Safeguard profitability and your bottom line.

Unparalleled Protection

AI-driven technology strengthens fraud, data, and payment security.

Proactive Visibility

YoozProtect is the only solution that proactively detects risks before payment execution.

Peace of Mind

Let Yooz constantly monitor risks, flag documents, and send alerts automatically.

Proactive Fraud Prevention & Detection

- AI-powered Smart Fake Detection analyzes transaction patterns and detects anomalies in real time.
- Uses advanced methodology to detect hidden data or changes.
- Leverages metadata analysis to detect signs of tampering or manipulation in documents.
- Applies PDF layer inspection to identify concealed changes or potential fraud within PDF files.

Atypical Amount Detection

- Employs statistical pattern analysis to identify irregular payment amounts based on historical vendor payment data.
- Offers customizable transaction thresholds to strengthen control measures.

Vendor Authentication & Management

- Confirms vendor details in real-time for accurate and up-to-date information.
- Detects vulnerabilities in banking data to reduce potential risks.
- Enriches master data integrity to proactively prevent fraud.

User Authentication & Security

- Applies role-based access controls to restrict system access to authorized personnel.
- Uses Multi-Factor Authentication (MFA) and Single Sign-On (SSO) for added protection.
- Safeguards sensitive financial data with AES-256 level encryption.

Process & Audit Assurance

- Monitors all document activities with detailed audit trails.
- Adheres to industry-leading financial security frameworks, including COSO, PCI-DSS, and NIST, ensuring strict compliance.

U.S. businesses lose billions every year to AP fraud. Don't be the next victim.
